## **Top 10 Online No No's**

(Known by ANY trained Technician)

1. Clicking on email attachments from unknown senders
2. Installing unauthorized applications
3. Turning off or disabling automated [security tools](#)
4. Opening HTML or plain-text messages from unknown senders
5. Surfing gambling, porn, or other legally-risky Websites
6. Giving out passwords, tokens, or smart cards
7. Random surfing of unknown, untrusted Websites
8. Attaching to an unknown, untrustworthy WiFi network
9. Filling out Web scripts, forms, or registration pages

**Last but NOT Least!**

**10. We do NOT endorse or suggest using pirated software & Kids are Notorious for doing this then telling parents they know what they're doing. No They Don't!**

**Your technician can tell you what caused your problems after he does the removal of the viruses.**

**Installing pirated software without scanning it first !**

It is not merely the illegal software that could be infected. The sites themselves are infested with malware.

Some of the **worst types of [malware infections](#) can be contracted and spread by visiting crack, keygen, warez and other pirated software sites.** In many cases, these sites are infested with a smörgåsbord of malware. **Those who attempt to get software for free can end up with a computer system so badly damaged that recovery is not possible and it cannot be repaired.** When that happens there is nothing you can do besides **reformatting and reinstalling Windows.**

**Merely visiting** such sites without downloading ANYTHING is one of the worst things a user can do online
